Work as a women in a men's world

All my life I've been working in a men's world. I feel very comfortable in their way of thinking. As a matter of fact it is a lot of times an advantage to be a women. Most clients feel more at ease, trust a women sooner and are more inclined to reveal their business problems.

Problems you meet

As a person I'm very practically orientated. Every problem has its solution. Now in my 50ties there are no problems at all. When I did business on a Greek Island, in my 30ties, yes local banks would ask for my husband and do no new business with me. Also at that time I was raising children. It was more difficult to find a balance between private life and business life.

Goals

My business goals are to grow my company. Every new client is a challenge. Because each client expects something else from me. This is what excites me in my work. Also the combination of working internationally and national is where I feel the most comfortable. My private goals are to be able of life time learning. In my international network I've got plenty of opportunities to do so.

My success

My success is what I advise to anybody who wants to be an entrepreneur. First of all be very clear of what you want. That have passion for your goals. See every problem as a challenge. Have good trusted advisors around you, who are interested in your well being and success. Be open for critics and learn from your mistakes.
